

# The Quick Guide TO LIGHTROOM SHORTCUTS

FOR MACINTOSH OS

To view a full list of shortcuts for each module use **Cmd + /**

## Library

To switch to Library Module  
**G** or **Cmd + Option + 1**

**Quick Tips:** Hold down the **Option** key and you will see:

- Import and Export buttons become Import Catalog and Export Catalog
- Clarity and Vibrance in Quick Develop become Sharpening and Saturation
- Hold down at startup to choose a catalog

## Develop

To switch to Develop Module  
**D** or **Cmd + Option + 2**

**Quick Tips:**

- When cropping, hold down Command to bring up the straighten tool
- When using arrows to move sliders, hold Option for small increments and Shift for larger increments

## Map

To switch to Map Module  
**Cmd + Option + 3**

## Slideshow

To switch to Slideshow Module  
**Cmd + Option + 5**
